Delhi, sangam vihar

ABOUT ME

Data Science graduate with hands-on experience in python, SQL, data analysis, machine learning, data preprocessing, and feature engineering.

Experienced in analyzing datasets, developing and evaluating machine learning models, and building end-to-end data solutions. Strong analytical and problem-solving skills **with previous Data Science internship experience.**

Intrested in applying data-driven approches to financial and business problem.

EDUCATION

Bachelor of computer Science

Galgotias University | 2022-2025

Diploma Computer Science

Galgotias University | 2019-2022

SKILLS

Programming:-Python, SQL, Data Structure & Algorithms

Machine Learning:- Scikit-learn, XGBoost, LightGBM, CatBoost, Random Forest

ML Engineering:- Feature Engineering, Data preprocessing, Model Evaluation, Cross-Validation, Hyperparameter Tuning, ML pipelines

Data Analysis:-Pandas, Numpy, Exploratory data analysis, Excel

Software Engineering:- object-oriented programming, Data structure & Algo, Code Review, Debugging, Version control (GitHub)

Deep Learning:- PyTorch, TensorFlow

Deployment:- Streamlit, FastAPI

Tools:- google colab, GitHub, Jupyter Notebook, VS Code

Relevant Coursework

- Machine Learning
- Data structure & algo
- Database Management System
- Probability & Statistics

PROFESSIONAL EXPERIENCE

Data Science Intern

College Pur | Apirl 2026 - Agust 2026

- Built end-to-end data science solutions using Python and Scikit-learn, covering data preprocessing, feature engineering, model development, and evaluation.
- Cleaned, transformed, and analyzed structured datasets to identify patterns and generate actionable insights.
- Developed and evaluated machine learning models including Random Forest, XGBoost, LightGBM, and CatBoost.
- Applied cross-validation and hyperparameter tuning to improve model performance.
- Collaborated with team members through GitHub, code reviews, debugging, and repository management.
- Promoted to Team Leader for 3 months, coordinating team activities, supporting members, and ensuring timely completion of technical tasks.

Achievements

- Promoted to Team Leader** during the Data Science internship based on technical performance and contribution.
- Intern of the Week** - recognized for outstanding technical performance.
- Team Leader of the Week** - recognized for effective leadership and team coordination.

Projects

Gate College Recommendation System

- Analyzed student rank, category, budget, and preference data to develop a personalized college recommendation system.
- Performed data preprocessing and feature engineering using Pandas and Scikit-learn.
- Compared Random Forest, XGBoost, LightGBM, and CatBoost models using appropriate evaluation metrics.
- Built a Nearest Neighbors-based recommendation engine to generate personalized recommendations.
- Applied cross-validation and hyperparameter tuning to optimize model performance.
- Developed a FastAPI endpoint for integrating the recommendation system into an application workflow.

IT Ticket Auto Resolution System

- Built an automated ticket classification and resolution system using Machine Learning.
- Preprocessed customer/support ticket text using NLP techniques.
- Classified incoming tickets into relevant categories and issue types.
- Implemented automated resolution suggestions based on ticket data.
- Evaluated model performance using accuracy, precision, recall, and F1-score.

More Projects
